# Table of contents

List of figures . . . . .	XVII
Preface and Acknowledgements . . . . .	XIX
Bibliographical abbreviations . . . . .	XXI
1 Bibliographical abbreviations . . . . .	XXI
2 Languages . . . . .	XXVI
3 Sites and archaeological context . . . . .	XXVI
4 Middle Assyrian kings . . . . .	XXVII
Chapter 1: Introduction . . . . .	1
1.1 Terminology . . . . .	1
1.2 Historical setting . . . . .	5
1.3 Previous scholarship . . . . .	7
1.4 Geographical setting . . . . .	9
1.4.1 Aššur . . . . .	9
1.4.2 Peripheral territory . . . . .	10
1.4.2.1 Chronology of peripheral texts . . . . .	13
1.5 Selection of texts . . . . .	15
1.5.1 Criteria . . . . .	15
1.5.2 Definition of Middle Assyrian grammar . . . . .	16
1.5.3 Genres . . . . .	19
1.5.3.1 Literary texts . . . . .	21
1.5.3.2 Royal inscriptions and epics . . . . .	24
1.5.3.3 Letters . . . . .	25
1.5.3.4 Administrative and legal documents . . . . .	29
1.5.4 Regional variation . . . . .	30
1.6 Methodology . . . . .	32
1.6.1 Method of citation . . . . .	33
1.6.2 Transliteration . . . . .	34
1.6.3 Transcription . . . . .	35
Chapter 2: Orthography . . . . .	36
2.1 General features of Akkadian cuneiform . . . . .	36
2.2 Historical development . . . . .	37
2.3 Cuneiform signs . . . . .	43
2.3.1 Logograms . . . . .	43
2.3.1.1 Sumerian verbal forms . . . . .	46
2.3.1.2 Determinatives . . . . .	49
2.3.1.3 Markers . . . . .	50
2.3.2 CvC signs . . . . .	54

2.3.3 Signs used to indicate mimation . . . . .	56
2.4 Spelling . . . . .	57
2.4.1 Plene spelling of gemination . . . . .	57
2.4.2 Plene spelling of long vowels . . . . .	60
2.4.2.1 Initial plene spellings . . . . .	64
2.4.3 Stress . . . . .	66
2.4.3.1 Unexpected plene spellings in MAL A–B . . . . .	68
2.4.4 Metathesis of quantity 1: vC: > v:C . . . . .	71
2.4.5 Metathesis of quantity 2: v:C > vC: . . . . .	73
2.4.6 Metathesis of syllables/inverted spellings . . . . .	75
2.4.7 Abnormal syllabification . . . . .	76
2.4.8 Graphemic gemination . . . . .	77
2.4.9 Defective writings, aphasis and breaking of words . . . . .	78
2.4.10 Sandhis . . . . .	79
Chapter 3: Phonology Part 1: Vowels . . . . .	82
3.1 Vowel /a/. . . . .	82
3.2 Vowels /i/ and /e/. . . . .	83
3.3 Vowels /u/ and */o/. . . . .	87
3.4 Diphthongs . . . . .	89
3.5 Assyrian vowel assimilation . . . . .	90
3.5.1 Assyrian vowel assimilation in nominal forms . . . . .	90
3.5.2 Assyrian vowel assimilation in finite verbs . . . . .	92
3.5.3 Sound changes related to vowel assimilation . . . . .	96
3.6 Other vocalic changes . . . . .	98
3.6.1 Syncope/elision . . . . .	98
3.6.2 Epenthetic vowels . . . . .	98
3.6.3 Shortening of long vowels . . . . .	100
Chapter 4: Consonants . . . . .	102
4.1 Emphatic consonants . . . . .	102
4.2 Weak consonants . . . . .	104
4.2.1 Semivowel /y/. . . . .	107
4.2.2 Semivowel /w/. . . . .	111
4.2.3 Etymologic aleph and ayin . . . . .	116
4.2.4 Laryngeals /h/ and /ħ/. . . . .	119
4.2.5 Vowel contraction . . . . .	121
4.2.5.1 Contraction of a+a . . . . .	121
4.2.5.2 Contraction of a+i . . . . .	121
4.2.5.3 Contraction of a+u . . . . .	122
4.2.5.4 Contraction of i+a . . . . .	123
4.2.5.5 Contraction of i+i . . . . .	123
4.2.5.6 Contraction of i+u . . . . .	124
4.2.5.7 Contraction of u+a . . . . .	124
4.2.5.8 Contraction of u+i . . . . .	125
4.2.5.9 Contraction of u+u . . . . .	125

4.3 Guttural /ħ/	125
4.4 Labial plosives b/p	126
4.5 Plosive velars /g-k-q/	130
4.6 Dental plosives /d-t-ṭ/ and interdental	133
4.7 Sibilants	138
4.7.1 Sibilants /s-š-z/	138
4.7.2 Sibilant /š/	140
4.7.3 Sibilants before dentals	142
4.7.4 Interchangeability between /s/ and /š/	144
4.7.5 Assimilation of pronominal suffix -š	148
4.7.6 Metathesis of sibilants and interdental	150
4.8 Nasals /m-n/	151
4.8.1 Loss of mimation	157
4.9 Liquids /l/ and /r/	159
Chapter 5: Structure of Nouns	161
5.1 Noun patterns and roots	161
5.1.1 Two-radical roots	163
5.1.2 Three-radical roots	164
5.1.3 Expanded patterns	167
5.2 Suffixes	170
5.2.1 Abstract nouns with <i>-utt</i>	170
5.1.2 Suffix <i>-ān</i>	171
5.2.3 Nisbe	172
5.3 Loans	177
5.3.1 West-Semitic loans	177
5.3.2 Babylonian loans	178
5.3.3 Sumerian loans	178
5.3.4 Hurrian loans	180
Chapter 6: Inflection of Nouns	182
6.1 Genus	182
6.2 Status rectus and its declinations	185
6.2.1 Dual	191
6.2.2 Plural	192
6.3 Status constructus	198
6.3.1 Bound forms with pronominal suffixes	203
6.4 Status absolutus	207
Chapter 7: Syntax of Nouns	209
7.1 Nominative	209
7.2 Genitive	209
7.3 Accusative	214
7.4 Apposition	216
Chapter 8: Adjectives and Participles	219
8.1 Adjectives	219

8.2 Adjectives: secondary stems . . . . .	221
8.3 Adjectives: secondary patterns . . . . .	222
8.4 Syntax of the adjective . . . . .	224
8.5 Participles . . . . .	226
8.6 Participles with suffixed <i>-ān</i> . . . . .	228
Chapter 9: Numbers . . . . .	231
9.1 Logographic numbers . . . . .	231
9.2 Cardinal numbers . . . . .	233
9.3 Ordinal numbers and adjectives . . . . .	236
9.4 Adjective number <i>PaRāSī</i> . . . . .	239
9.5 Fractions . . . . .	242
9.5 Nouns derived from numerals . . . . .	243
9.6 Other numerals . . . . .	244
Chapter 10: Personal Pronouns . . . . .	245
10.1 Independent personal pronouns . . . . .	245
10.1.1 Nominative independent pronouns . . . . .	245
10.1.1.1 Function of nominative independent pronouns . . . . .	246
10.1.2 Dative and accusative independent pronouns . . . . .	248
10.1.2.1 Function of accusative and dative independent pronouns . . . . .	251
10.2 Pronominal suffixes . . . . .	254
10.2.1 Function of the pronominal suffixes . . . . .	259
10.3 Possessive personal pronouns . . . . .	262
Chapter 11: Other Types of Pronouns . . . . .	265
11.1 Demonstrative pronouns . . . . .	265
11.1.1 <i>anniu</i> ‘this’ . . . . .	265
11.1.2 <i>ammiu</i> ‘that’ . . . . .	267
11.1.3 <i>alliu</i> ‘that’ . . . . .	267
11.2 Demonstrative pronouns referring to quantity . . . . .	268
11.2.1 <i>akukia</i> ‘so-and-so-much’ . . . . .	268
11.2.2 <i>annannu</i> ‘so-and-so (for PNs)’ . . . . .	268
11.2.3 <i>annannia</i> ‘so-and-so (for objects)’ . . . . .	269
11.3 Reflexive and reciprocal pronouns . . . . .	269
11.3.2 <i>aḥā’iš</i> ‘together’ . . . . .	270
11.4 Indefinite pronouns . . . . .	271
11.4.1 <i>mamma</i> ‘somebody’ . . . . .	271
11.4.2 <i>mimmû</i> ‘something/property’ . . . . .	272
11.4.3 <i>mimma</i> ‘something’ . . . . .	273
11.4.4 <i>mīnummê</i> ‘everything’ . . . . .	274
11.4.5 <i>iyāmattu</i> ‘each, everyone’ . . . . .	274
11.4.6 <i>attamannu</i> ‘each one’ . . . . .	274
11.4.7 <i>gabbu</i> ‘all, everything’ . . . . .	275
11.4.8 <i>kalu</i> ‘all’ . . . . .	275
11.4.9 <i>kilallān</i> ‘both’ . . . . .	276

11.5 Determinative pronouns . . . . .	276
11.5.1 <i>ša</i> as determinative pronoun . . . . .	276
11.6 Interrogative pronouns and adverbs . . . . .	276
11.6.1 <i>alē</i> ‘where?’ . . . . .	277
11.6.2 <i>ayyānu</i> ‘where?’ . . . . .	277
11.6.3 <i>ayyū</i> ‘which?’ . . . . .	277
11.6.4 <i>ayyēša</i> ‘whither?’ . . . . .	277
11.6.5 <i>kē</i> ‘how?’ . . . . .	278
11.6.7 <i>mannu</i> ‘who?’ . . . . .	278
11.6.8 <i>mīnu</i> ‘what?/why?’ and <i>anaʾīne</i> ‘why?’ . . . . .	279
Chapter 12: Enclitic Particles . . . . .	281
12.1 The particle <i>-ma</i> . . . . .	281
12.1.1 Focus marker . . . . .	281
12.1.1.1 The particle <i>-ma</i> with pronouns . . . . .	283
12.1.1.2 The particle <i>-ma</i> with adverbs . . . . .	284
12.1.2 The particle <i>-ma</i> of identity . . . . .	285
12.1.3 The particle <i>-ma</i> of distinction . . . . .	286
12.1.4 Unclear usage of <i>-ma</i> . . . . .	287
12.2 The particle <i>-mi/me</i> . . . . .	288
Chapter 13: Prepositions . . . . .	290
13.1 Primary prepositions . . . . .	291
13.1.1 <i>ana</i> ‘to(wards)’ . . . . .	291
13.1.2 <i>ina</i> ‘in’ . . . . .	294
13.1.3 Confusion between <i>ana</i> and <i>ina</i> . . . . .	297
13.1.4 <i>adi</i> ‘until, up to, together with’ . . . . .	298
13.1.5 <i>iltu</i> ‘with’ . . . . .	300
13.2 Secondary prepositions . . . . .	301
13.2.1 <i>aššum</i> ‘concerning, because of’ . . . . .	301
13.2.2 Preposition <i>kīma</i> and related <i>kī</i> , <i>akī</i> , <i>kīmū</i> and <i>kumu</i> . . . . .	302
13.2.3 <i>balu(t)</i> ‘without’ . . . . .	305
13.2.4 <i>ezib</i> ‘apart from’ . . . . .	306
13.2.5 <i>uššer</i> ‘excluding that’ . . . . .	307
13.3 Prepositional phrases . . . . .	307
13.3.1 <i>bēt</i> . . . . .	308
13.3.2 <i>battubattēn</i> ‘both sides’ . . . . .	308
13.3.3 <i>bere</i> ‘among, between’ . . . . .	308
13.3.4 <i>eberti</i> ‘the other side’ . . . . .	309
13.3.5 <i>ellān(u)</i> ‘above, over’ . . . . .	310
13.3.6 <i>libbu</i> ‘heart’ . . . . .	310
13.3.7 IGI = <i>maḥar</i> <sup>2</sup> . . . . .	311
13.3.8 <i>muhḥu</i> ‘top’ . . . . .	312
13.3.9 <i>panū</i> ‘front, face’ . . . . .	314
13.3.10 <i>pū</i> ‘mouth’ . . . . .	317
13.3.11 <i>ina pitte</i> ‘in the responsibility of’ . . . . .	318

13.3.12 <i>qablum</i> ‘middle’	319
13.3.13 <i>qātu</i> ‘hand’	319
13.3.14 <i>šaplu</i> ‘bottom’	320
13.3.15 <i>taršu</i> ‘extent/duration’	320
13.3.16 <i>ṭiḥi</i> ‘adjacent to’	320
13.3.17 <i>urki</i> ‘after, behind’	321
Chapter 14: Adverbs	323
14.1 Adverbs of location	323
14.1.1 Spatial deixis	323
14.1.1.1 Suffix <i>-ānu</i>	324
14.1.1.2 Suffix <i>-āka</i>	324
14.1.1.3 Suffix <i>-ēša</i>	325
14.1.2 Locative <i>-um</i> and <i>-ānum</i>	325
14.1.3 Other adverbs of location	326
14.2 Adverbs of number	327
14.2.1 Quantifying adverbs of the type <i>n-ātu</i>	327
14.2.2 Quantifying adverbs of the type <i>PaRSišu</i>	327
14.2.3 Quantifying adverbs of the type <i>PaRSutte-</i>	328
14.2.4 Other adverbs of number	329
14.3 Adverbs of manner	330
14.3.1 Terminative-adverbial <i>-iš</i>	330
14.3.2 Other adverbs of manner	331
14.4 Adverbs of time I: specific	332
14.4.1 <i>kannamāre</i> ‘in the early morning’ and <i>namāru</i> ‘at dawn’	332
14.4.2 <i>ūma</i> ‘today’ and variations	333
14.4.3 Other specific adverbs of time	334
14.5 Adverbs of time II: unspecific	336
14.5.1 <i>entu</i> ‘at that time; when’	336
14.5.2 <i>urkūu</i> , <i>urkittu</i> and <i>urkiš</i> ‘afterwards’	337
14.5.3 Other unspecific adverbs of time	338
14.6 Interjections	339
Chapter 15: The Verb: Regular Inflection	340
15.1 General remarks	340
15.2 The prefix conjugation	341
15.2.1 The theme vowel	343
15.2.2 The <i>i</i> -modus	344
15.2.3 Examples	345
15.3 The suffix conjugation: the stative	349
15.4 The Infinitive	354
15.5 The derived stems	355
15.5.1 The D-stem	355
15.5.2 The Š-stem	362
15.5.3 The N-stem and passive voice	364
15.5.4 The <i>tan</i> -stems	367

15.5.5 The <i>ta</i> -stems . . . . .	369
15.6 The quadr radical verbs . . . . .	373
Chapter 16: Weak Verbs . . . . .	375
16.1 R <sub>1</sub> /weak . . . . .	375
16.1.1 I/u and I/i . . . . .	375
16.1.2 I/voc . . . . .	378
16.1.3 I/n verbs . . . . .	385
16.2 R <sub>2</sub> /weak . . . . .	387
16.2.1 II/voc . . . . .	387
16.2.2 II/aleph verbs . . . . .	392
16.2.3 II/gem verbs . . . . .	394
16.3 R <sub>3</sub> /weak verbs . . . . .	396
16.3.1 III/ū verbs . . . . .	398
16.3.2 III/ī and III/ē verbs . . . . .	399
16.3.3 III/aleph verb . . . . .	404
16.4 Double-weak verbs . . . . .	407
16.4.1 <i>ba<sup>ʔ</sup>u</i> ‘to seek for’ . . . . .	407
16.4.2 <i>elā<sup>ʔ</sup>u</i> ‘to go up’ . . . . .	408
16.4.3 <i>nadā<sup>ʔ</sup>u</i> ‘to lay down’ . . . . .	409
16.4.4 <i>niāku</i> ‘to have intercourse’ . . . . .	410
16.4.5 <i>qa<sup>ʔ</sup>u</i> ‘to wait’ . . . . .	410
16.4.6 <i>uppu<sup>ʔ</sup>u</i> ‘to obtain’ . . . . .	411
16.4.7 <i>ra<sup>ʔ</sup>ā<sup>ʔ</sup>u</i> ‘to pasture’ . . . . .	411
16.4.8 Less commonly attested double-weak verbs . . . . .	412
16.5 Irregular verbs . . . . .	414
16.5.1 The existential verbs <i>ibašši</i> and <i>laššu</i> . . . . .	414
16.5.2 <i>alāku</i> ‘to go’ . . . . .	416
16.5.3 <i>danānu</i> ‘to be strong’ . . . . .	419
16.5.4 <i>izuzzu</i> ‘to stand’ . . . . .	419
16.5.5 <i>našā<sup>ʔ</sup>u/našš-</i> ‘to carry’ . . . . .	420
16.5.6 <i>sasā<sup>ʔ</sup>u</i> ‘to call’ . . . . .	421
16.5.7 <i>t/nadānu</i> ‘to give’ . . . . .	422
16.5.8 <i>udā<sup>ʔ</sup>u</i> ‘to know’ . . . . .	425
16.5.9 <i>ušā<sup>ʔ</sup>u</i> ‘to go out’ . . . . .	426
16.5.10 <i>ušābu</i> ‘to sit’ . . . . .	428
Chapter 17: Function of Verbal Categories . . . . .	430
17.1 Tenses and mood in Middle Assyrian . . . . .	430
17.2 The present: general remarks . . . . .	430
17.2.1 The present in the literary corpus . . . . .	431
17.2.2 The present in contracts and other administrative documents . . . . .	433
17.2.3 The present in letters . . . . .	434
17.3 Past tense: the perfect and preterite - general remarks . . . . .	436
17.3.1 The perfect and preterite in letters . . . . .	436
17.3.2 The perfect and preterite in administrative documents . . . . .	439

17.3.3 Historical development of the past tense in late Middle Assyrian . . . . .	441
17.4 The perfect and preterite for the future tense . . . . .	443
17.4.1 The perfect and preterite in MAL A–B . . . . .	444
17.4.2 The perfect and preterite in MAPD and rituals . . . . .	448
17.4.3 The perfect and preterite in letters and administrative documents . . . . .	450
17.4.4 The epistolary perfect . . . . .	451
17.5 The imperative, precative and prohibitive . . . . .	452
17.6 The stative . . . . .	455
17.7 The infinitive . . . . .	458
17.8 The ventive . . . . .	463
17.9 The subjunctive . . . . .	467
Chapter 18: Syntax: Simple Clause . . . . .	474
18.1 Congruence of subject and predicate . . . . .	474
18.2 Hendiadys . . . . .	477
18.3 Word order and topicalization . . . . .	478
18.4 Casus pendens . . . . .	481
18.5 Nominal clauses . . . . .	482
18.6 Questions . . . . .	487
18.7 Negation . . . . .	489
Chapter 19: Syntax: Coordination . . . . .	494
19.1 The conjunction <i>u</i> . . . . .	494
19.2 The sentence connector <i>-ma</i> . . . . .	496
19.3 Asyndetic constructions . . . . .	498
19.4 <i>ū</i> ‘or’ . . . . .	499
19.5 <i>lū</i> ‘be it, or’ . . . . .	500
19.6 <i>ula</i> . . . . .	502
19.7 <i>šumma/entu</i> ‘when’ . . . . .	502
Chapter 20: Syntax: Conditional clauses . . . . .	503
20.1 Conditional sentence with <i>šumma</i> in law texts . . . . .	503
20.2 Conditional clauses outside law texts . . . . .	505
20.3 Oaths and irrealis . . . . .	506
20.4 Conditional sentence without <i>šumma</i> . . . . .	507
Chapter 21: Syntax: Dependent Clauses . . . . .	510
21.1 Relative clause and the particle <i>ša</i> . . . . .	513
21.1.1 Head of the relative clause . . . . .	514
21.1.2 Relative clause without a head . . . . .	517
21.1.3 Asyndetic relative clauses . . . . .	518
21.1.4 Relative clauses with <i>ammar</i> and other constructions . . . . .	519
21.2 Adverbial and complement clauses . . . . .	520
21.2.1 <i>adi</i> : different functions . . . . .	520
21.2.2 <i>ašar</i> : local clause . . . . .	522
21.2.3 <i>aššum</i> : causal clauses . . . . .	523
21.2.4 <i>iltu</i> : temporal clauses . . . . .	524

21.2.5 <i>ina ūme/mate</i> : temporal clauses . . . . .	525
21.2.6 <i>kī</i> : various adverbial and complement clauses . . . . .	526
Chapter 22: Syntax: Direct Speech . . . . .	530
22.1 Verbs introducing direct speech . . . . .	530
22.2 The particle <i>mā</i> . . . . .	531
22.3 The particle <i>akkīa</i> . . . . .	533
Chapter 23: Paradigms . . . . .	535
Chapter 24: Sign list . . . . .	549
Chapter 25: Concordances . . . . .	571
25.1 Berlin (VAT siglum) . . . . .	571
25.2 Istanbul (A siglum) . . . . .	572

## Preface and Acknowledgements

This study is the result of my PhD research, which I started after my graduation in 2011. The following year, the project received three years' funding from the Deutsche Forschungsgemeinschaft, enabling me to fully concentrate on my research. I was introduced to Middle Assyrian studies by J. G. Dercksen in the form of two seminars at Leiden University, although the theme of my dissertation was suggested to me by Prof. M. P. Streck. He continued to support me as my first supervisor and, without his valuable comments and ideas, this dissertation could not have been finished.

Prof. Wiggermann allowed me to use many of his unpublished Tell Šabī Abyaḍ texts, which represent a significant contribution to our knowledge of Middle Assyrian grammar. Meanwhile, N. J. C. Kouwenberg sent me some early drafts of his Old Assyrian grammar. His ideas, expressed in his manuscript and in personal correspondence, helped shape this study in many respects. J. C. Johnson kindly provided me with an early version from his edition of the M 6 archive. This study uses his numbering of the tablets in the Istanbul Museum. P. Gauthier sent me his dissertation on the large M 4 archive, F. Schmidt her master's thesis on the M 14 archive and O. Vinnichenko her dissertation on Neo Assyrian syntax. I consulted these unpublished manuscripts.

I furthermore want to thank various scholars who helped me in several ways by providing comments or suggestions: G. Barjamovic, Y. Bloch, Prof. E. Cancik-Kirschbaum, Prof. J. Hazenbos, S. Jakob, Prof. M. Krebernik, J. Llop, D. Shibata, Prof. M. Stol and M. Worthington. I would also like to thank M. Hilgert, J. Marzahn of the Vorderasiatisches Museum in Berlin and A. Lassen of the Yale Babylonian Collection for allowing me to collate some Middle Assyrian tablets. Various people read parts of my dissertation and helped me to improve my English and other aspects: R. Essam, B. McGrath, B. Kemperman, A. Kungl and M. Greiner-Siebert. Most notable is B. McGrath, who was kind enough to read the manuscript on multiple occasions. I would like to particularly express my gratitude to M. Luukko who gave me many constructive and insightful comments during the revision process. Thanks are also extended to the students who attended my classes on Middle Assyrian at the Leipzig university for their input and various suggestions on interpreting the documents.

During the writing of my dissertation, my loving wife, Elyze Zomer, was my biggest support. Moreover, her comments and remarks on Middle Assyrian incantations and Middle Babylonian palaeography also proved to be invaluable.

Leipzig, February 2018

Jacob Jan de Ridder

# Chapter 1: Introduction

## 1.1 Terminology

§ 1 Akkadian is the oldest attested Semitic language and the first to split from the Semitic family tree; together with Eblaite, it formed the Eastern Semitic (ES) branch. As ES split from the other Semitic languages, Akkadian contains a number of innovations and archaisms unknown in the other Semitic languages. Akkadian itself is attested from 2600 BCE until the first century CE, a long period, which, in terms of length, is third only after the other Middle Eastern languages, Egyptian/Coptic (about 3000 BCE and from about 1700 CE onwards as a literary language) and Aramaic (about 1000 BCE to the present time). Like Aramaic, the large geographical area in which Akkadian was spoken or written caused the development of a number of vernaculars that may be called independent languages, instead of dialects. The contrast between North and South Akkadian is well known in the Assyrian and Babylonian languages. Moreover, different vernaculars of Akkadian existed in peripheral cities, written by scribes with a different linguistic background. Despite these linguistic differences, official languages were developed in Standard Babylonian (SB) and the hymnic-epic dialect to be used for official and monumental inscriptions, and religious and literary texts. The situation resembles the Arabic world, where the written language is dominated by the official Modern Standard Arabic, but where dialectal forms often appear. This is the situation in the Late Bronze Age (1550–1200 BCE), where Akkadian reached its highest geographical extent, and Akkadian cuneiform was written from Kabnak (Elam) in the east to Amarna (Egypt) and Ḫattuša (ancient Anatolia, modern Turkey) in the west. The situation of North-West Mesopotamia is of particular interest, where Akkadian was the main scribal language in the kingdoms of the Hittites, Mittani and Aššur. Akkadian archives were mainly found in the cities of Emar, Nuzi, Alalah, Ugarit, Ḫattuša, Amarna and Aššur.<sup>1</sup> In this study, we will refer to this group as “Western Peripheral Akkadian” (WPA), as the different vernaculars that can be found in each city have a lot in common in terms of scribal traditions (see § 61).<sup>2</sup> The Akkadian of Aššur differs in one important respect from the rest of WPA, that is, it was written by scribes with an Akkadian linguistic background, as opposed to other WPA dialects where the native language was Hurrian, Hittite or a variant of North-West Semitic (NWS). In this

---

1 For smaller find spots, see the overview in Pedersén (1998). Note that our main sources for the cuneiform of Mittani are the diplomatic letters were found in Amarna (Egypt).

2 Some confusion seems to exist about the exact extent of the term WPA (Izre’el 1992, 172). For this reason, it is best to give our own definition of the term here, which will be retained during the rest of the study. WPA includes all non-Babylonian native dialects written west of Babylonia. This excludes the Canaanite-Amarna dialects found, for instance, in the Byblos correspondence. This is due to the large extent of local North-West Semitic influences in these letters, as opposed to AmAkk and UgAkk, which makes these letters less suitable for comparison. MA is sometimes included here, since it has a scribal tradition borrowed from Babylonia, in common with all other WPA dialects.

situation, we find the Middle Assyrian (MA) corpus. While the royal inscriptions and literary compositions, such as the Tukultī-Ninurta epic, were written in SB, while texts with a more practical use, such as laws, letters and contracts, were written in the language of the people, albeit often with a number of Babylonianisms. Nowadays, there is some dissension as to when the Old Assyrian (OA) period ended and when the MA period started (cf. Veenhof/Eidem 2008, 23–24 § 1.2; Miglus 2011, 221). In our study, there can be no misconception: the MA period started, as determined by the oldest dated tablet (KAJ 177), with the reign of Aššur-nērārī II.<sup>3</sup> Disregarding royal inscriptions, MA texts are attested from the reign of Aššur-nērārī II (1424–1418/1414–1408) until the reign of Aššur-bēl-kala (1073–1056).<sup>4</sup> The obscure period between the end of level 1b archives in Kültepe and this first MA legal text has to be regarded as an intermediate period. Anything else belongs to the field of social and political historical studies, and is of little interest to our grammatical research.

§ 2 The map presented below attempts to approach the linguistic landscape in the late second millennium prior to the Assyrian conquest in a very global fashion. It should not be taken as gospel, especially as it does not take the overlap of different languages into account and omits the possibility of bilingual communities. Even nowadays, language distribution is very erratic, especially in the more elevated areas that contain small pockets of linguistic enclaves, which continue to thrive due to their remoteness. As for the late second millennium period, we can state that we know relatively little about the ethnic and linguistic composition of Northern Mesopotamia in this period. Most of our material comes from the aforementioned cities, such as Alalah, Emar and Nuzi, where scribes did not write in their native languages. As such, we must mostly rely on PNs to approach the distribution of different ethnic groups. It seems that Hurrian and related groups were mostly centred around the northern part of the Tigris River and the Ḥabur Triangle, where the main cities of the Mittani Empire were centred. NWS groups, such as the Suteans, were found along the Mediterranean coast and the Euphrates River (cf. Kärger/Minx 2012, 367). As a nomadic

3 It appears that the marriage contract TIM 4 45 is actually the oldest MA text, but its eponym Urad-Šerū'a cannot be dated, while the origin of the text itself is of unknown origin. It has some features not known from later MA, such as the values <āb> used in OA and <lib> (LUL). The particle *-mi* (§ 418ff) is also atypical for MA. Note also the absence of VA in l. 10 *aš-[š]a-ti-mi*. Another indication of an early date of the texts is the use of ZU and ZA for assimilated pronominal suffixes (§ 225) in l. 5 *mu-sā* and l. 6 *aš-ša-si*. In terms of palaeography, Saporetti (1968) notes the uncommon PNs, with the palaeography being closer to Nuzi than MA. Again, in EMA (108f), Saporetti suggests an early dating to before EAd–Aub. Freydank gives a broader estimate and dates the eponym Urad-Šerū'a to the reign of Aššurnir II–Aub (BMCG, 177), based on its occurrence in KAM 10 20. However, there is no reason to assume that there could only be one eponym of the name Urad-Šerū'a in Assyrian history, for instance, there were two eponyms during the reign of TN by the name Abattu. It seems, therefore, quite possible to date the said text to the period before Aššurnir II, based on the Nuzi-like palaeography, unknown PNs and the odd sign values. Donbaz (2001) attempted to connect this Urad-Šerū'a to two post OA tablets with the said eponym; however, these texts are clearly very close to the OA period, and therefore Donbaz' claim cannot be accepted. See also Veenhof (1982, 363 n4). KAM 10 25 is another possible early Middle Assyrian tablet.

4 Aššur-nērārī is mentioned in KAJ 177:10. The Giricano texts have been dated to the reign of Aššur-bēl-kala; see Giricano, 52 § III.2. At least three texts from the M 7 archive date to the reign of the king; see ALCA 1, 70–71; MARV 10, 1.

group, their geographical distribution overlapped to a great extent with Hurrians. Akkadian distribution continued from the south up until Aššur, but probably not north of it. The population of such places as Tell Ar-Rimāh (cf. Sasson 1979) and Nineveh (cf. Veenhof 1999) was most probably ethnic Hurrian. If there was a dialect continuum with Babylonian, direct contact was only possible through the area of the Euphrates River as the Zab area was home to the Hurrian kingdom of Arrapha.<sup>5</sup> We cannot be certain to what extent the Assyrian destruction of Ḫanigalbat changed the linguistic landscape. It is probably safe to say that Assyrian spread to cities such as Nineveh and Arbail. But, despite the colonization of Ḫanigalbat, the presence of Assyrian in Ḫanigalbat was less permanent and, if anything, seems to have opened up the possibility of the rise of Aramaean tribes. The settlement of these nomadic people probably ended the linguistic expansion of Assyrian over this area.

Figure 2: Map of the linguistic landscape.<sup>6</sup>

§ 3 The Assyrian language is usually regarded as a dialectal form of Akkadian.<sup>7</sup> The terminology of dialect has, until the present day, has been viewed negatively. It is usually seen as a corrupted form of the standard language, while many unjustly claim that their own

5 This does not mean that Akkadian-speaking communities were not present in this area. In fact, the influence of Assyrian Akkadian in the Nuzi corpus is well known (e.g., Wilhelm 1970, 35–38) and Assyrian people are certainly attested in Nuzi as having participated in Nuzi society (e.g., Maidman 2010, 15).

6 This map is a view of the linguistic landscape surrounding the Assyrian enclave, prior to the fall of Mittani. A possible Akkadian dialect continuum boundary is indicated by the black line. The map does not account for language overlapping.

7 For a discussion of the terminology of ‘dialect’, see Finegan (2008, 14–18).

speech is free of dialect (see Finegan 2008, 15). Such claims are unjustified, as dialects usually develop independently from the standard language, although they do share a common origin. Moreover, to a degree, every person speaks in dialect, which is regionally motivated; differences between social classes exist as well. One well-known example is the difference between Jewish and Christian Aramaic (NENA), spoken in the same region (Khan 2011, 709). At the same time, mutual intelligibility is known to have existed between different languages or is absent within one language because people do not want to communicate with people of another group (cf. Chamber/Trudgill 2004, 3–4). For Akkadian, the latter situation remains difficult to detect, but regional differences are quite apparent. Certainly, we will see that the Assyrian dialect of this study is sometimes more archaic than Standard Akkadian. This does not mean that there cannot be a corrupted form of a language. A famous example is the Canaanite-Akkadian language in some of the Amarna letters (Rainey 1996), but this did not reflect a spoken language, meaning that the terminology of “dialect” can be somewhat misleading. It should also be noted that there are no firm rules to establish the difference between a language and a dialect. This is mostly political or even religiously dictated, e.g., one can hardly claim that vernacular Moroccan and Egyptian are dialects of the same language (Arabic), as they are certainly not intelligible to each other. Moroccan Arabic is especially distant from Modern Standard Arabic and, in its daily use, is full of code-switching between Moroccan Arabic and non-Semitic languages, such as French, Berber and even Spanish in some areas.<sup>8</sup> Based on political and religious motives, the different Arabic dialects are usually not officially recognized or only partly. This brings us to another possible criterion of dialect: it is usually not written. If we applied this definition, Assyrian would not be regarded as dialect because it is often written. Moreover, the Assyrian texts are rather uniform and hardly betray any variety between speakers, be it regionally or socially motivated. This is actually a problem in most Akkadian dialects. An attempt by Goetze (1945) to prove different regional dialects based on sign values was accepted by some (e.g., Oppenheim 1964, 55), while Kraus (1973a, 32–34) rightfully pointed out that these dialectal differences are no more than orthographic variation. In addition, despite the structural differences between Assyrian and Babylonian it has been pointed out that both dialects had a remarkably parallel development, e.g., in MA/Middle Babylonian (MB), we have the loss of mimation, sound change /št/ > /lt/, the increased use of the perfectum over the preterite, and the loss of the t-stems. It could be argued that these changes were caused by the mutual intelligibility between the two dialects, where grammatical changes could easily spread over the different vernaculars (Parpola 1988c, 294). Moreover, the lexicon between the vernaculars did not show remarkably large differences (Kogan 2006; Streck 2007, 67ff). This has led to the conclusion that both dialects were mutually intelligible by some (Kouwenberg 2010, 12). Although Geller (2002, 563) compared the difference with Dutch and German, when referring to Neo-Assyrian (NA), he pointed out that both languages are only mutually intelligible when written. As a Dutch native, I must confess that I (and most other Dutch people) had to learn German in order to understand it. I therefore doubt whether this comparison is valid for Akkadian and question the extent of mutual intelligibility between Dutch and German. Blau

---

8 Code-switching is not an alien phenomenon to Akkadian. The royal archive of Qatna contains a number of instances where an Akkadian sentence is suddenly followed by a Hurrian verb; see Richter/Lange (2012).

(2012, 19ff) applied the wave model (Wellentheorie) to the Canaanite languages. According to this model, different languages, which separated at different moments in time from a proto-language, could later become more similar to each other because of long periods of intensive contact and geographic proximity. Thus, applying this model to Akkadian languages, Assyrian and Babylonian may originally have been quite different, but grew much closer to each other in the course of the second millennium BCE because of the intensive cultural contact. This has some merit when we compare OA and Old Babylonian (OB) with the smaller differences in MB and MA.

## 1.2 Historical setting

§ 4 After the OA period had come to a political climax with the reign of Šamšī-Adad I, the city of Aššur lost its political importance and fell into obscurity for centuries, together with most of Mesopotamia. The end of the OA period could have been formally marked with the deposition of Šamšī-Adad's dynasty, as well as the short intercession of usurper Puzur-Suen, a king who was erased from the Assyrian King List.<sup>9</sup> Around this period, the last OA texts were found.<sup>10</sup> During the following "Dark Age" (1759–1350) (see Cifola 1995, 17ff; Yamada 2017), the Hurrian people rose to prominence and several Hurrian states, such as Arrapha (modern Kirkuk) appeared, which were dependent on the Mittani Empire. A historical reference in the treaty, between the Mittani king Šattiwaza and Suppiluliuma of the Hittites, mentions that Šauštatar, one of Šattiwaza's predecessors, had carried away the two doors from Aššur to his own palace in Waššukanni.<sup>11</sup> This essentially meant the end of the political independence of Aššur, but the continuity of the Assyrian King List suggests that the royal dynasty continued as vassals of their Mittani overlords. A short interim period lacking any Assyrian royal inscription is believed by some to be related to the Hurrian dominion.<sup>12</sup> However, during the reign of Šuttarna II, the doors were returned, which signalled the renewed independence of Aššur and possibly even supremacy over Mittani.

§ 5 The details of Assyria's independence are unclear, but, under Aššur-nērārī II, the oldest known MA text (KAJ 177) was written. Less than a century later, Aššur-uballiṭ I wrote to the Egyptian court (letter EA 15 and EA 16) referring to himself as great king (LUGAL GAL in EA 16:1). The early MA texts from Aššur refer to the monarch as king for the first time (e.g., KAJ 162:10) since Šamšī-Adad I, instead of the traditional ÉNSI (*išši'akku*) "steward". However, the title "great king" equalled that of the contemporary kings of Hatti, Babylonia and Egypt. This caused the Babylonian king, Burnaburiaš II, to complain to the pharaoh as he regarded the Assyrians to be his vassals (EA 9). Nonetheless, Aššur-uballiṭ was also militarily successful as he boasts in his inscriptions to have conquered Mušru and other Hurrian territory (RIMA 1 A.0.76.1). The city of Tell Ar-Rimāḥ is believed to have

9 See Grayson (1985); RIMA 1 A.0.40; Reade (2001, 5–8). The Puzur-Suen inscription featured a typical OA palaeography, orthography and language, which were used before the time of Šamšī-Adad I.

10 See Gelb/Sollberger (1957); Donbaz (2001). Many of the OA tablets from Aššur appear to be slightly younger than the material of Kültepe; for a more complete list, see Michel (2003, 121ff § 2.1).

11 See Weidner (1923, 38–57 no. 2); Beckman (1999, 42–54 no. 6A–B).

12 See Yamada (1994, 30f); Lion (2011, 155).
